

Dental Pods Academy

Course Prospectus

Introduction

Welcome to Dental Pods Academy, a leading provider of dental nursing education. Our mission is to deliver high-quality training that equips aspiring dental nurses with the knowledge, skills, and competencies required to excel in their careers. This prospectus outlines our comprehensive Dental Nursing course, designed in line with the National Examining Board for Dental Nurses (NEBDN) and General Dental Council (GDC) guidelines.

About Dental Pods Academy

Dental Pods Academy is a recognized training provider, committed to excellence in dental nursing education. Our experienced faculty, state-of-the-art facilities, and student-centric approach create a supportive learning environment that fosters academic and professional growth.

Course Overview

The Dental Nursing course at Dental Pods Academy is a comprehensive program that prepares learners for the NEBDN National Diploma in Dental Nursing. The course duration is typically 12-18 months, depending on the learner's pace and individual circumstances.

Course Content

The course covers all essential aspects of dental nursing, including:

1. Oral anatomy and physiology
2. Infection control and prevention
3. Chairside assistance and instrumentation
4. Dental radiography
5. Dental materials and equipment
6. Oral health education and promotion
7. Medical emergencies in the dental practice
8. Legal and ethical aspects of dental nursing
9. Communication and teamwork in dentistry
10. Dental specialties (e.g., orthodontics, periodontics, endodontics)
